LTV by cohort

Plan Mix: 2024-11 vs Neighboring Cohorts

Black Friday когорта (2024-11): стабільний retention (110%+) не підтверджує гіпотезу про імпульсивних покупців — натомість це наслідок структури планів: 50.44% когорти обрали Annual, який «світиться» активним без щомісячних платежів. Через це накопичений LTV когорти (≈78) виявився суттєво нижчим за сусідні когорти (жовтень ≈117, грудень ≈91).

Висновок: акція Black Friday не виправдана — вона дала видимість гарного утримання, але не принесла пропорційного доходу.

UNIT ECONOMICS & CHANNELS

***Paid channels only (excl. ASO Organic & Referral) | CAC** — marketing spend / users from paid channels | **LTV** — avg revenue per user from paid channels (incl. non-payers as \$0) | **LTV/CAC** — healthy benchmark ≈ 3 | **Renewal Rate** — % of paying users who renewed subscription*

Unit economics by country

Country	CAC by Country	LTV by Country	LTV/CAC by Country
US	\$58,7	\$99,2	1,69
UK	\$59,4	\$88,0	1,48
DE	\$54,7	\$75,6	1,38
BR	\$30,8	\$41,1	1,33
MX	\$32,8	\$42,9	1,31
PL	\$37,5	\$46,7	1,25
